

AFENDA
TRUTH. CANONICAL. VERIFIED.

MARK MEANING

Afenda is the truth engine for modern organizations. Our mark represents an intelligent observer within a bounded system, where all signals are resolved, verified, and written as the **one canonical truth**.

SYSTEM FIELD

The circle represents a closed, secure system where truth is contained and governed.

LYNX OBSERVER

The lynx symbolizes precision, clarity, and silent intelligence that sees beyond noise.

TRUTH BEADS

A sequence of verification points that represent canonical checkpoints through the truth pipeline.

TRUTH FLOW

The gradient flow from blue to purple represents the journey from raw signal to verified truth.

GRADIENT BG

CONSTRUCTION

COLOR SYSTEM (OKLCH)

RAW SIGNAL
oklch(62% 0.18 250)

PROCESSING
oklch(68% 0.16 275)

VERIFIED TRUTH
oklch(58% 0.20 310)

MONOCHROME USAGE

WHITE ON DARK

BLACK ON LIGHT

ALL INPUTS. ONE TRUTH. VERIFIED.

AFENDA

PRINT COLOR SYSTEM

Production references for translating Afenda from screen color into controlled physical output. CMYK values are press-safe starting points; Pantone references are recommended spot targets that must be proofed with the printer and substrate.

SIGNAL → PROCESSING →

TRUTH

Precise blue. Controlled indigo. Resolved violet.

RAW SIGNAL / BLUE

#2563EB

C85 M65 Y0 K0
Pantone C: 2728 C
Pantone U: 2728 U
Strong blue; keep clean, no black.

PROCESSING / INDIGO

#5B21B6

C80 M95 Y0 K0
Pantone C: 2736 C
Pantone U: 2736 U
Deep transition anchor.

VERIFIED TRUTH / VIOLET

#9333EA

C60 M85 Y0 K0
Pantone C: 2665 C
Pantone U: 2665 U
Authoritative violet, not neon.

GRADIENT PRINTING STRATEGY

Do not treat the brand gradient as unmanaged RGB art. Use Pantone + CMYK hybrid production or a printer-approved spot-blend simulation. Add 1-2% noise grain to long gradients to suppress banding. Export raster gradients at 300 DPI minimum; use 16-bit source artwork when available.

INK COVERAGE CONTROL

TOTAL INK LIMIT

≤ 280%

Avoid C+M above 180% in violet blends. Do not add K to the gradient unless producing a dark-only lockup. For rich black backgrounds, use C60 M40 Y40 K100 only when the printer approves the stock and drying profile.

MONOCHROME AND MATERIAL REFERENCES

Black on light CMYK 0 / 0 / 0 / 100 Pantone Black C

White on dark Reverse / knock-out No ink for mark

Premium black CMYK 60 / 40 / 40 / 100 Rich black

SUBSTRATE ADJUSTMENT

Coated Use standard CMYK and Pantone C targets.

Uncoated Use Pantone U targets; expect softer violet.

Matte Request slight contrast boost on gradient.

Textured Avoid fine gradient transitions and tiny beads.

PRINT PROOF REQUIRED BEFORE PRODUCTION / AFENDA BRAND COLOR REFERENCES ARE GOVERNED BY OUTPUT, STOCK, AND LIGHTING CONDITIONS
